

Training and education program at PNC

At the end of the 2-year training, graduating students receive a PNC certificate and an Associate's Degree diploma (for the ones who passed the state exam), recognized by the MoEYS. Graduates also have the possibility to carry on studying in year three at university, if they pass the state exam.

We make a continuous effort to improve the quality of our training, adjust it to the needs of a fast-changing market and ensure our students are as competitive as their university graduate counterparts. Therefore, PN Cambodia launched the 'Open' project in October 2016, a vast program to update the curriculum of our 2-year training answering two main objectives:

- To make sure our students gain the soft and hard skills necessary to not only earn a job but also to advance in their career and be able to self-learn. To do so, we started providing more interactive activities and a student-centered approach, allowing students to take ownership in the learning process.
- To improve students' English skills as this is a necessary prerequisite for furthering their career.

This year we have 75 students in batch 2023.

there are 4 classes. There are.

1. **Class2023_A**
2. **Class2023_B**
3. **Class2023_C**
4. **Class2023_D**
