

CHAPTER 9: WEB BROWSER

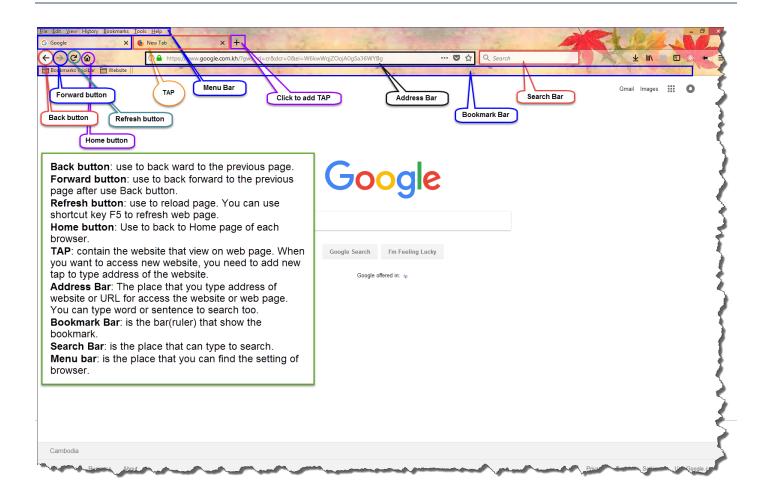

WEB Browser

A web browser is a tool (application/software) use to access the World Wide Web.

There are many web browsers but the most top usage are:

NAVIGATE BROWSER

Bookmark: is the folder or book that contain favorite website/webpage that you want to keep. Step to create Bookmark:

- 1. Show your Bookmark bar: There are different way to view on different browser.
- 2. Right click on Bookmark bar => create new folder=> give the name
- 3. Copy website or webpage that you want to keep => right click on your folder => past

You can create Bookmark by category:

Synchronize your Bookmark

Synchronize mean do two or more things to the same thing in the same time. Example. I synchronize my Bookmark in to two computer, it mean my two computers will have the same bookmark. If I update any website on my computer (1), it will have automatically on my computer (2).

Step to configure synchronize your book mark:

Different browser different way to register.

- 1. Make sure you have email account (gmail, yahoo, hot mail, ...)
- 2. Register your email account with browser that you use. (Mozilla Firefox, Chrome, Safiri..) in your computer.
- 3. Chose what you want to sync. (History, bookmark,Add-ons)
- 4. Save change.
- 5. Login to other computer with your account (register with browser). So all your bookmark will sync to your second computer.
